Career Objective

I am a **Full Stack .NET Web Developer and Solution Engineer** and a Computer Science & AI student at Damietta University, with hands-on experience in designing and building scalable web applications.

I specialize in developing end-to-end solutions using **C#, .NET Core, ASP.NET MVC, Entity Framework, LINQ, and SQL**, with a strong focus on system design, problem-solving, and delivering efficient business-oriented solutions.

I am experienced in analyzing requirements, translating them into technical architectures, and implementing clean, maintainable code following SOLID principles and agile methodologies.

I seek an opportunity to contribute to impactful software projects, enhance my solution design skills, and grow within a collaborative and innovative environment.

Education

Bachelor's degree in Computer and Artificial Intelligence,
Damietta University

2022 – 2026 | Egypt

- GPA: 3.3

Work Experience / Internships

Solution Engineer (Part-Time, Remote), Cognigate

01/2026 – Present | UAE

- Designed and delivered end-to-end business solutions using Freshworks and Profit.co.
- Analyzed client requirements and translated them into scalable technical solutions.
- Customized workflows, automations, and dashboards to improve business performance.
- Integrated platform features to streamline operations and enhance user experience.
- Collaborated with teams and stakeholders to ensure successful delivery.

Full Stack .NET Web Developer (Intern), Digital Egypt Pioneers Initiative (DEPI) — Egyptian Ministry of Communications & IT

06/2025 – 12/2025 | Egypt

- Completed a 6-month intensive training program covering ASP.NET Core, Web API, and Entity Framework.
- Designed and developed a full-stack web application as a capstone project, applying backend, database, and API development concepts.
- Built scalable backend systems and RESTful APIs using ASP.NET Core and Entity Framework.
- Worked with HTML5, CSS3, JavaScript, Docker, and Git in a collaborative development environment.
- Applied clean code principles, unit testing, and SQL best practices to deliver maintainable solutions.

Web Development Using .NET (Intern),
Information Technology Institute (ITI)

07/2025 – 08/2025 | Egypt

- Completed 120 hours of training in C#, ASP.NET MVC, SQL Server, and EF.
- Developed web apps using MVC architecture and relational databases.
- Implemented practical projects to apply core web development concepts.
- Gained hands-on experience in real-world development workflows and best practices.

Skills

Technical Languages

C#, PYTHON, SQL

Front-End Technologies

HTML, CSS, JavaScript, Bootstrap

Development Tools and Environments IDEs

Visual Studio, Visual Studio Code, Git, GitHub

Back-End Technologies

.NET Core, .NET MVC, LINQ, Entity framework

Programming Concepts

Object-Oriented Programming (OOP), SOLID, Data Structures, Problem solving

Language skills

English - Conversational

Certificates

Digital Egypt Pioneers Program (DEPI) – Full Stack .NET Web Developer

Issued by Ministry of Communications and Information Technology Egypt | June 2025 – December 2025

- Completed a 6-month intensive training program in ASP.NET Core, Web API, Entity Framework, and SQL Server.
- Successfully built and delivered a full-stack web application as a capstone project.

ITIDA & GIGS Program – Freelancing Skills

Issued by Information Technology Industry Development Agency | September 2025

- Completed training focused on freelancing platforms, client communication, and digital work practices.
- Gained practical knowledge in project delivery, proposal writing, and remote work collaboration.

Projects

NABD | AI-Powered Maternal Health Monitoring System (Graduation Project)

10/2025 – Present

- Designed and developed a scalable full-stack healthcare platform using ASP.NET Core MVC (.NET 8), EF Core, and SQL Server.
- Architected a multi-role system (RBAC) supporting Patients, Doctors, Assistants, and Admin with secure access control.
- Integrated external AI-powered services for OCR-based lab test analysis and product safety classification.
- Implemented real-time communication using SignalR for instant health alerts and system notifications.
- Built comprehensive modules for appointment scheduling, medical history timeline, prescriptions, and health tracking.
- Applied best practices in clean architecture, dependency injection, and RESTful API integration.

Masar | Smart Learning & Career Progression Platform

10/2025 – 12/2026

- A full-stack web-based learning platform specialized in programming education.
- The system provides structured learning tracks (roadmaps), modular courses, and practical assignments.
- It enables students to track their progress, complete lessons, and earn verifiable certificates.
- Instructors can create courses, manage modules and assignments, and monitor student performance.
- The platform implements role-based dashboards for Students, Instructors, and Admins, ensuring a smooth and personalized learning experience.
- Tools & Technologies: ASP.NET Core MVC, C#, Entity Framework Core, SQL Server, JWT/Identity Authentication, Figma for UI Prototyping, RESTful APIs, Cloud Storage Integration, GitHub, Agile Methodology
